CLO3D Expert
La Tecnocreativa, 2022

Pattern making, cut & sew
ISS Moda, 2016

OUTDOORS

Surfing, kitesurfing, skiing and hiking

PROFILE

Pattern maker and designer with 7+ years turning design concepts into production-ready garments, from hand-drafted patterns and toiles to digital patterns in Gerber AccuMark and CLO3D, and on to bulk production. I have worked at both ends of the industry. At a small artisanal label in London, I co-designed, patterned, graded, sewed and produced every collection hand in hand with the creative director. At Zara Woman, I develop the collection's most construction-led styles with designers, the atelier, suppliers and factories. My final BA collection, *Age Revolution*, was made entirely from textile-industry leftovers. I now want to bring this craft to technical apparel built for the outdoors.

EXPERIENCE

Pattern Maker 2023 – present
ZARA Woman (Inditex) · A Coruña, Spain

- Develop patterns for the most creative, construction-led styles of the Woman collection, about 30 styles per season, working daily with designers and the in-house atelier to turn sketches into new shapes.
- Lead each style from first pattern to bulk: brief sample machinists, run fittings, and coordinate the supplier and factories in Morocco through to production sign-off.
- Solve construction across a wide range of fabrics (linen, ramie, viscose, wool blends, gabardine, satins): pleats, godets, drapes, all kinds of pockets, waistbands and closures.
- Digital pattern making and grading in Gerber AccuMark; pattern development in CLO3D or by draping on the stand.

Pattern Maker & Assistant Designer 2020 – 2023
Ricorrrobe · London, UK

- Right hand to the creative director of this artisanal Japanese label: co-designed two collections a year and drafted every pattern together.
- Coordinated the studio team (5 people) through sampling and production, and graded patterns for production.
- Organised and sewed production in the London studio, and ran the brand's showroom at Paris Fashion Week.

Digital Pattern Maker & 3D Designer 2022 – 2023
Nina Skarra, luxury womenswear (Oslo) · Remote

- Built garments and photoreal renders in CLO3D for online pre-sales, then produced the production patterns for London manufacturing once order quantities were confirmed.

Pattern Maker (freelance) 2022 – 2023
EGG Trading · London, UK

Costume Designer, Pattern Cutter & Seamstress 2021 – 2022
The Cockpit Theatre · Secret Art Gallery · London, UK

- Designed, patterned and made period costumes for *Emmeline* (The Theatre Lab Company) and costumes for immersive art experiences.

Fashion Studio Intern 2019 – 2020
Emilio de la Morena · London, UK

- Marked up and laid patterns, draped new ideas on the stand, sewed and hand-finished garments, and attended fittings for London Fashion Week.

Fashion Designer 2018 – 2019
PACT 04, supplier to Inditex and other high-street brands · Barcelona, Spain

- Promoted from intern to designer. Owned the design process from trend research to proposals, managed samples across departments, and presented collections to Pull&Bear, Bershka, Stradivarius, Oysho, Mango, Desigual, Springfield and Cortefiel.
